**OPI Program Overview**

Addresses the overdose epidemic through prevention, surveillance, and research with both state and local partners:

<table>
<thead>
<tr>
<th><strong>Collects and shares emergency department, hospitalization, prescription, and death certificate data on overdoses.</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Studies the circumstances surrounding overdose deaths.</strong></td>
</tr>
<tr>
<td><strong>Promotes the inclusion and use of California’s prescription drug monitoring program (PDMP) - Controlled Substance Utilization Review and Evaluation System</strong></td>
</tr>
<tr>
<td><strong>Builds state and local partnerships</strong></td>
</tr>
<tr>
<td><strong>Establishes linkages to care</strong></td>
</tr>
<tr>
<td><strong>Expands the use of evidence-based prescribing and treatment guidelines for providers and health systems</strong></td>
</tr>
</tbody>
</table>
Fentanyl
A Potent and Dangerous Synthetic Opioid

Continues to be a major contributor to drug overdoses in CA, including among youth.

Between 2018 to 2020, among those ages 10-19 years in CA:
• ED visits related to non-fatal opioid overdoses more than tripled.
• Opioid-related overdose deaths increased by 407 percent, largely driven by fentanyl.
• Fentanyl-related overdose deaths increased 625 percent.

Fentanyl can be found in different forms, including pills, powder, and liquid.

Any pill (regardless of its color, shape, or size) that does not come from a health care provider or pharmacist can contain fentanyl and can be deadly.

Signs of an Overdose: Save a Life

Signs of overdose

Recognizing the signs of opioid overdose can save a life. Here are some things to look for:

- Small, constricted “pinpoint pupils”
- Falling asleep or losing consciousness
- Slow, weak, or no breathing
- Choking or gurgling sounds
- Limp body
- Cold and/or clammy skin
- Discolored skin (especially in lips and nails)
Actions Steps to Take

If you think someone is overdosing, follow these steps:

1. Call 911 and give naloxone
2. Keep the person awake and breathing
3. Lay the person on their side to prevent choking
4. Stay with the person until 911 responders arrive
Stop an Opioid Overdose with Live-Saving Naloxone

- A life-saving medication used to reverse an opioid overdose, including heroin, fentanyl, and prescription opioid medications.
- Is safe and easy to use, works almost immediately, and is not addictive.
- Can be quickly given through nasal spray (Narcan) or through an auto-injector into the outer thigh.
- Has very few negative effects, and has no effect if opioids are not in a person’s system.

Learn more about naloxone
CDPH: Statewide Standing Order for Naloxone

- CDPH provides a **statewide standing order** to help support equitable access to naloxone.
- Authorizes entities in California to distribute naloxone to:
  - individuals at risk of opioid overdose,
  - family members and friends,
  - other persons in a position to assist
- Resources:
  - Standing Order Frequently Asked Questions
  - Training Video: Administering Naloxone
  - Email: naloxonestandingorder@cdph.ca.gov

DHCS: Naloxone Distribution Project (NDP)

- DHCS administers the Naloxone Distribution Project (NDP).
- Aims to reduce opioid overdose deaths through the provision of free naloxone.
- Qualified organizations and entities can request free naloxone from DHCS and have it directly shipped to their address.

Resources:
- NDP Frequently Asked Questions
- Email: Naloxone@dhcs.ca.gov
A patient with active SUD was given naloxone. They had a friend staying with them who overdosed and the patient was able to reverse them.

A teenager was reverse twice recently thanks to a family member who had been trained to use naloxone.

Girlfriend of the unresponsive male said he had overdosed. Coalition member ran back into her apartment to get her Narcan kits. She successfully reversed the overdose after administering Narcan and performing CPR.
You’re Invited: **Youth Cannabis Prevention Initiative** Webinar

**NEW WEBINAR**

**Addressing Youth Cannabis Use & Adult Influence**

Thursday, October 13, 2022 from 11:00 a.m. – 12:00 p.m. PDT

Register here

- Current CA landscape of youth mental health and cannabis use.
- CDPH’s formative research and community needs outreach efforts.
- CDPH’s upcoming Youth Cannabis Education and Prevention Media Campaign.

District Level Naloxone Policy: Lake County

- SafeRx Lake County (a CDPH-funded coalition) worked with Lake County Office of Education to implement a local school naloxone policy.
- Allows for the superintendent or designee, or any trained district staff member, to administer naloxone during an opioid overdose.
- Includes language to ensure the superintendent or designee trains and distributes naloxone kits to district staff and replaces any used or expired kits.

Resources for Educators and Adult Role Models

• Webpage that houses a collection of opioid and substance use prevention resources for adult role models working with youth, including educators.

• Let’s Talk Booklets (Marin County)
Local Coalition Objectives

1. Translate Data into Action
2. Expand Medication Assisted Treatment (MAT) Access
3. Develop and Adopt Local Opioid Policies and Procedures
4. Promote Public Education and Awareness
5. Increase Access to Care and Services for High-Risk Populations
6. Promote Harm Reduction Services
7. Increase Access to Naloxone
8. Promote Safe Prescribing
9. Implement Drug Prevention Activities

Narcan for All K-12 Schools

Smita Malhotra, MD
Medical Director
Los Angeles Unified School District
Over recent weeks, 9 students have overdosed across the District.

7 were linked to the Bernstein campus and Hollywood High School.
In response—we announced that we would have Narcan in all K-12 schools by mid-October.
Parents, I strongly urge you to have discussions with your child about making healthy choices and about the dangers of ingesting illicit drugs especially as we enter into end-of-year celebrations and the summer.

LOS ANGELES COUNTY DEPARTMENT OF PUBLIC HEALTH ALERT

Dear Los Angeles Unified families,

The Los Angeles County Department of Public Health has released an alert indicating that there is a strong likelihood of Ecstasy pills contaminated with Fentanyl that have entered into the community in Los Angeles.

Three adolescents in Los Angeles County ingested these drugs and suffered neurological consequences. The pills were purchased online and raise significant concern for the growing trend of contaminated illicit drugs and overdoses in Los Angeles County.

We encourage you to have discussions with your child about making healthy choices and about the dangers of ingesting any illicit drugs especially as we enter into end-of-year celebrations and the summer.

Thank you for your partnership and support as we continue to keep our schools and communities safe.

Warmly,
Smita Malhotra, MD
Medical Director
Los Angeles Unified School District

We had started working on the availability of Narcan in schools in June—when LACDPH had released an alert about the growing trend of illicit drugs contaminated with Fentanyl.
District Response

- The availability of Naloxone in all K-12 schools
- Peer-to Peer Counseling
- Family Academy/Parent Engagement
- Safety Response
The availability of Naloxone in all K-12 schools

Working with LACDPH to get Narcan Doses

Children’s Hospital Los Angeles has provided doses

Applied to DHCS Naloxone Distribution Project

Los Angeles Trust for Children’s Health has connected us to community based organizations
Narcan in K–12 Schools

• Training for all healthcare staff in the District

• We are also asking for District staff to volunteer to be trained

• Monday October 3rd—webinar training for healthcare staff

• Going forward, any member of our District staff can be trained through our online training portal
Peer-to-Peer Counseling

• Peer-to-peer counseling is a research-backed intervention

• Students are trained to mentor peers in areas including mental, relational and reproductive health.

• The District is partnering with the Health Information Project (HIP), and with organizations such as the The Los Angeles Trust for Children’s Health, to implement and expand peer-to-peer counseling programs.
Family Academy/Parent Engagement

• We have expanded our partnerships with educators, community based organizations and hospitals

• Courses will also provide information about locations providing direct support for affected families.

• Starting this week, the Family Academy will begin to host special segments, expanding upon the successful programming offered to date.
Family Academy/Parent Engagement

• District educators and hospitals will build family knowledge and capacity in the following:

• Introducing our District campaign, “Make a Choice”

• Families will be introduced to the science of substance abuse, what substances look like and the mental and physical damages of those who use substances.

• We will offer ample time during Family Academy segments to dialogue with families in order to direct people to our campuses, wellness centers and partner organizations for immediate support.
## Family Academy/Parent Engagement

Safety Response

• Los Angeles Unified is developing a safety task force with community organizations, law enforcement and other partners to identify and review emerging issues.

• The task force will also coordinate safety plans for school communities.

• School Police Chief will involve law enforcement partners for immediate support to schools.

• We will use enhanced, data driven methodologies to identify hotspots and concentrate our efforts around strategies to support our schools and/or the most critical incidents.
Next Meeting
